FOR TEL

Rekor Scout™

VEHICLE RECOGNITION SOFTWARE

Scout enables accurate automatic license plate and vehicle recognition on any IP, traffic, or surveillance camera. The results are displayed on a web based interface which can be accessed from anywhere. Setup is quick and easy.

"Rekor has become the new standard in LPR technology for Westchester, NY."

- Lt. Brian Hess
Westchester County, New York PD

EXPERIENCE STATE-OF-THE-ART LPR

- Recognizes vehicles and license plates in over 70 countries
- Identifies issuing state for all 50 US states, Canada, and Mexico
- Recognizes vehicle color, make, model, and direction of travel
- Extremely accurate from years of machine learning
- Significantly more accurate and affordable than legacy OCR solutions

SAVE MONEY AND VALUABLE TIME

- Reuse existing IP, traffic, and security cameras for LPR
- Quickly search historic data to find matching vehicles
- Enhance efficiency of personnel
- Force multiplier that reduces the frequency of in-person patrols

SECURE ADVANCED INSIGHTS

- Pinpoint high-risk locations with city-wide security and analytics
- Identify unauthorized vehicles on properties of interest
- Monitor vehicle activity entering and exiting locations with safety concerns

LEVERAGE ADVANCED BACK-OFFICE

- Customizable alerts (hotlists, NCIC, AMBER alerts, Silver alerts, and more)
- Secure data sharing and access control options via API, Rekor Public Safety Network (RPSN) and Federated search
- Multiple user accounts with different access roles
- Image verification to confirm license plate and vehicle results
- Review high-quality video clip of vehicle detection
- Searchable database and historical graphs
- Available both on-premises and in the cloud
- Access historical vehicle data to accelerate investigations

MAXIMIZE PERFORMANCE

- Real-time alerts sent the moment a vehicle of interest is detected
- Process multiple camera feeds at once for virtual geofence around your city
- Distribute processing across multiple servers for large-scale deployments
- Policy driven retention profiles gives complete control to the agency
